**Zones of Regulation**

In the RED ZONE we may be in an extremely heightened state of alertness, potentially triggering our fight, flight, freeze or flee protective response. We may feel elated, euphoric, anger, rage, devastated, out of control, panicked or even terrified when in the RED ZONE. When in the Red Zone we might need to pause and assess if we need to regulate and gain a sense of control of our strong feelings and high energy. For example, if we are feeling angry it may help to pause and count to 10 before we act.
